1. review of the sexual and psychological problems (RSPP) in MS – huge amount of work was done in Amsterdam. Core group – Jana, Anita, Wim and Michelle will send out the eligible publications and tabulating should be done before ECTRIMS meeting in Barcelona. There will be no SIG meeting there, but people who are present/know about the RSPP will try to meet.

Next steps: tabulating should be done before Barcelona (author/date/patients/interventions/main results) before we could continue. Also new articles should be searched through.

Mieke has agreed to help Michelle.

Mette has agreed to help writing the review.

Jannie has agreed to help with the practical part of the manual (text from the midwife?)
