Please **submit** the abstract to: VirtualSIGmobility2020@gmail.com

For this call, we accept ***two kinds*** of abstracts:

1. *Clinical practice, physiotherapy education and/or clinical research experiences during the COVID-19 pandemic.*

Structure of the abstract: please submit a paragraph describing the information you would like to share with a maximum number of 250 words. The abstract does **not** have to follow the default structure of a background, methods, results and conclusion.

Examples of content that will be considered here:

- describing methods when working (clinical/education/research) during the COVID pandemic
- describing case studies of patients undergoing virtual rehabilitation during the COVID pandemic
- describing personal/patient encountered challenges and strengths of working with alternative methods during the COVID pandemic

Please note, for this section, videos or photos of materials or technologies used (in consideration of GDPR rules) during the virtual presentation is encouraged.

2. *Research activities related to rehabilitation in multiple sclerosis*

Structure of an abstract: please submit a structured abstract with background, methods, results and conclusion with a maximum number of 250 words.
